

Duraline®

Industrial Strength Electrical Products for Industrial Strength Users

Heavy-Duty Lighting Streamer

Duraline has been manufacturing quality Lighting Streamers since 1946. Our **Heavy-Duty Lighting Streamer** is the mainstay of our lighting line.

Heavy-Duty Lighting Streamers provide safe overhead temporary lighting and come ready to hang. Sockets are spaced at 10 ft intervals with a 5 ft lead and tail and are ruggedly constructed and integrally molded in solid rubber to either a #14 or #12 AWG three conductor heavy-duty SOW-A cable. **Heavy-Duty Lighting Streamers** can be supplied with factory molded NEMA male and female plugs. Incandescent, fluorescent, or LED lamps can be used. Lamps are sealed by a rubber "O" ring molded into each socket. This "O" ring forms a watertight seal around the neck of each bulb, eliminating problems associated with oil, dirt, and moisture. Each socket is equipped with an external grounding ring, internal crush-proof steel reinforcing ring, and a heavy-duty brass grommet for quick and convenient installation.

Duraline Heavy-Duty Lighting Streamers are your best choice for durable, long lasting, reusable lighting in abusive indoor/outdoor environments.

Each streamer socket may be protected by one of our two available heavy-duty guards (optional). You may choose from either a red vinyl coated steel guard or a crushproof clear lexan guard.

Duraline lighting systems exceed O.S.H.A. requirements, and are suitable for IEC Class IP67 and NEMA Class 6 applications.

M107615	500	50	12/3	None
005061	Red Vinyl Coated Steel Guard			
004059	Lexan Crush Proof Guard			

For all other cable sizes, lengths, plugs, or socket spacing, contact a factory sales representative. Also available in Multi-Phase 4 and 5 wire configurations.

Heavy Duty Brass Mounting Grommet For Quick, Convenient Hanging

Solid Rubber Molded Construction With No Voids Or Air Gaps

Structural Integrity Of Cable Is Not Disturbed By Cutting Or Splicing

Cable Is A Heavy-Duty S00W Type

Assembly Is Integrally Molded To Cable

Brass External Grounding Ring For Use With Metal Guards

Durable Non-Phenolic Insulator Reduces Moisture Absorption

Steel Reinforcing Ring For Additional Crush Resistance

Nickle Plated Copper Alloy Screw Shell For Increased Protection From Elements

Lamp Neck "O" Ring Seal
